Steve,

we reported all data to the residents, including non-detects. Yes, only the first week (11homes) is available to the public at the moment.

**Subject:** Dimock Results

Rich,

What criteria did EPA use when reporting results to the residents of Dimock? Based on EPA's spreadsheet, EPA/DEP primary and secondary MCLs for drinking water were used and also EPA "trigger" levels. Did you also report to the residents any laboratory detects in the water? What about Pennsylvania Statewide Health Standards for groundwater from PA Code Title 25 Chapter 250? Also, it is my understanding that only the first week's worth of data has been publicly released so far. Is this correct?

Thank you,
